

## ALU S4 ELOXAL

### Alu S4 Eloxal – Elegant and durable

Aluminium is known for its pleasant and comfortable wear benefit due to its lightweight but sturdy material. We now have the possibility to enhance these benefits with modern surfaces & printings, e.g., the aluminium silver-matt finish in combination with the digital sub-eloxal printing.

The silky matt surface of anodised aluminium creates a very refined and premium quality effect.

The use of the high h-precision micro-waterjet cutting technology enables the fine, smooth edges, which add the last touch and are also textile-friendly.

The digital sub-eloxal printing is perfect in terms of surface finish, durable, resistant to abrasion and non-reactive to chemicals.

elegant

scratch-resistant

exclusive

### Product description

- Fine aluminium name badge with rounded corners
- Coloured backgrounds (except white) combined with:
  - only logo
  - logo and name, title etc.
- Scratch resistant sealed surface
- Lightweight and comfortable to wear

### Size

Dimensions: 69 mm x 21 mm

### Finish

- Different finish versions (coloured backgrounds) can be realised
- Specific colours: blue, black, red, orange, yellow etc.  
Remark: light colours such as yellow have a metallic appearance
- Metal colours: gold/silver matt (stainless steel optic)

### Fastening systems

1. Safety pin

2. Magnet
